Dear Madam:

This edition of the *PURITY COOK BOOK* has met with such an enthusiastic reception that within a few years from the time the book was first offered a new and improved edition is necessary. We accept this as very convincing proof that "The Masterpiece of Modern Kitchen Lore" has been generally approved by Canadian housewives.

May we draw your attention to the "Step-by-step method" in writing the recipes. So many women have complimented us on this feature that we believe it has been an important factor in making the *PURITY COOK BOOK* the most popular on the market.

All the recipes in this book in which flour is used have been tested with *PURITY FLOUR*. This work was undertaken by a practical housekeeper—an experienced Dietician, who, in submitting these recipes, has kept before her the actual working conditions in the average home. We believe, therefore, that you will find that this volume contains more recipes of an economical character than found in most cook books.

We invite your special attention to the introductory remarks to our *Cake Section*. There you will find a discussion of a very important subject—that of the effect of altitude on successful cake-making.

The large readable type in which the recipes are printed, and the binding which permits the book to lie flat when opened at any page, are features which have been retained in this second printing.

"The recipes in your new *PURITY COOK BOOK* give one new zest for cooking," was the testimony of a recent purchaser. It is our hope that with you this book will find similar favour. On the other hand if you require additional information about any of the recipes we hope that you will write us.

Important Message

Cooking* is an art, and the baking of bread, buns, cakes and pastries is the highest form of the art.

Just as in other arts, painstaking care must become a habit. This painstaking care in baking consists of using ingredients of quality; in mixing and blending, as the recipe or your experience indicates; and baking at the proper temperature.

The chief ingredient in your baking is flour, and you will therefore wish to use flour of the highest quality. PURITY FLOUR is made from carefully selected Canadian Hard Spring Wheat—the finest Wheat in the world—milled by the most modern processes, in mills kept scrupulously clean. (Soft Wheat Flour, commonly called Pastry Flour is made from Soft Winter Wheat and contains less protein than Hard Wheat Flour.)

PURITY FLOUR—*is oven tested, by actual baking of each day's production in our own laboratories.*

PURITY FLOUR—*has greater food value because of its high protein content.*
—*is economical to use—less flour is required.*
—*keeps your baked goods fresh for a longer period.*

To Obtain the Best Results:

1. Follow the recipe carefully—bake at the right temperature.
2. Sift your Purity Flour four or five times. *This is important.*
3. If you are using a favorite Soft Wheat Flour recipe, reduce the amount of PURITY FLOUR by one tablespoonful per cup called for by the recipe.

You will be delighted with the recipes in this book. Every recipe has been tested in the home, under normal baking conditions—with

THE ART OF MAKING BREAD

GENERAL RULES

To make light, appetizing bread of good color, texture and keeping qualities, it is necessary to have *good bread flour* and *good yeast*. But even satisfactory materials will give disappointing results if they are not handled properly, and the application of the advice contained in the following discussion is therefore recommended.

FLOUR should always be stored in a dry place, free from odors. Sift flour as it is required, and, in cold weather, warm it before using.

YEAST may be obtained in the form of both dry and moist cakes. Moist or compressed yeast can be used in baking bread by any process, and is particularly useful in the quick methods. Dry yeast, which keeps much better than the compressed form, can be used directly in the overnight *sponge* process, but should not be employed when shorter methods are

The **PURITY** COOK BOOK

followed, unless it is first made into an active ferment as described under "Home-made Yeast". Whichever kind of yeast is used, it should be as fresh as possible. If at all doubtful regarding the quality of yeast it is better to get a fresh supply rather than risk spoiling a whole batch of bread.

The SHORTENING may be lard, butter or prepared shortening.

CONSISTENCY OF DOUGH.—It is impossible to specify in any recipe the exact amount of flour required to a given quantity of liquid. In making bread with Purity Flour, the dough should be as soft as it can be for convenient handling, but should not be sticky. Be particularly careful in measuring the quantities of liquid and salt.

FERMENTATION CONTROL.—The proper regulation of the fermentation or "working" of the dough is of the greatest importance in bread making. Apart from the quantity of yeast used (and that is specified in the recipes) fermentation depends upon the temperature of the dough and the time of rising. An overworked dough, that is, a dough which has been kept too warm or allowed to rise too long, develops sour odors and gives loaves which are apt to possess, to a greater or lesser degree, the following characteristics:

Small size, pale-colored crust, rounded edges and corners, poor cutting qualities (crumbles easily), lack of flavor and poor keeping qualities (dries and stales quickly).

On the other hand, an underworked dough, that is, a dough which has been kept too cool or not allowed to rise long enough, gives loaves which are usually:

Small in size and possess a reddish-brown colored crust, sharp edges and corners, coarse texture and dark color.

If a dough rises very slowly it is generally because it has been mixed too cool or because an insufficient quantity of yeast has been used. When that happens it should be placed in a warmer place and the time of rising extended.

It will be seen that the control of temperature is of considerable importance in bread-making. Yeast-raised doughs should be mixed at 80 to 85 degrees F., and in getting the temperature within the desired limits an inexpensive dairy thermometer will be found of great value.

KEEP DOUGHS COVERED.—While doughs are rising they should always be kept well-covered, otherwise a crust will form upon the surface and cause dark streaks in the bread.

RISE IN THE PANS.—Under the Straight Dough process it is said that, after the pieces of moulded dough have been placed in pans, they should be allowed to rise until they are double the original bulk before placing in oven. This point should be watched carefully. If the dough is placed in the oven too soon, a small loaf of poor shape will be the result. If allowed to rise too much in the pan, either a loaf having a very open texture will be obtained or the dough

will sink in the oven. In shaping loaves for the pans do not handle any more than is necessary.

BAKING.—Individual pans of black sheet-iron are best for baking bread. The oven should be fairly hot—400 to 425 degrees F. At this temperature loaves will be baked in 35 to 60 minutes, depending upon the size. When loaves are evenly browned and shrink from the sides of the greased pan, the baking is complete. Unless the oven bakes very evenly, the loaves should be turned after they have been in oven about 20 minutes. Immediately loaves are taken from oven, they should be placed on a rack until quite cool.

The bread-box should be kept clean by scalding and exposing to sunlight at frequent intervals.

1 WHITE BREAD

(Straight Dough or 4½ hour Method)

(4 loaves)

2 compressed yeast cakes
4 cups water
3 tablespoons white sugar
2 tablespoons salt
(About) 12 cups sifted Purity Flour
2 tablespoons shortening (melted)

Method:—Dissolve yeast in ½ cup lukewarm water.

In the remaining liquid (which should not be above 100 degrees F.) dissolve the sugar and salt; then add yeast.

Mix in sufficient flour to make a soft batter; add shortening and beat well. Stir in sufficient flour to produce a dough soft enough to handle conveniently, but not sticky. Turn out on floured board and knead until soft and elastic. (The temperature of the dough should now be between 80 and 85 degrees F.)

Place in a greased bowl, cover and let rise until it is double the original

bulk; then punch down. Let rise again and, after punching down once more, divide into pieces which will half-fill baking pans.

Round these pieces into balls and let stand a few minutes; then mould into loaves and place in greased pans. Cover and keep in warm place while rising. When double in bulk, place in oven. (If the surface is pressed lightly with the finger, the slight depression thus made will remain when the loaves are ready for baking. Should the depression quickly disappear let rising continue a little longer.)

Bake in hot oven of 400 to 425 degrees for 35 to 60 minutes, depending on size of loaves.

NOTES

1. The liquid used may be plain water, potato water, milk or part milk and part water. When potato water is used, reduce the salt by amount used in cooking

potatoes. If milk is used it should be scalded and cooled.

2. Four cups of liquid yeast (prepared as given below) may be used in place of compressed yeast. If liquid yeast is used, reduce salt accordingly.
3. By the above method bread may be made in about $4\frac{1}{2}$ hours. Equally good bread may be made with half the amount of yeast specified, but the process will take longer.
4. When quick results are desired, double the amount of yeast.

2 HOME-MADE YEAST

3 or 4 medium-sized potatoes
4 cups boiling water
1 cup Purity Flour
2 tablespoons salt
 $\frac{1}{4}$ cup white sugar
1 dry yeast cake dissolved in 1 cup lukewarm water

Method:—Cook potatoes in boiling water, strain and mash until free from lumps. Measure flour, salt and sugar into 3-quart bowl and pour over this mixture, boiling potato water, stirring rapidly. Add potatoes, mashed, and beat well; when lukewarm, add yeast. Keep warm for 4 to 5 hours, stirring down from time to time. Bottle, but do not cork tightly. Keep in a cool place. Stir before using. (Instead of a dry

yeast cake, half a compressed cake may be used or a cup of home-made yeast.)

3 WHITE BREAD

(Overnight Sponge Method)

1 dry yeast cake
4 cups water
2 tablespoons salt
3 tablespoons white sugar
2 tablespoons shortening
12 cups sifted Purity Flour

Method:—Dissolve yeast in $\frac{1}{2}$ cup lukewarm water. To remaining lukewarm liquid, add salt, 1 tablespoon sugar, shortening and about one-half of the flour, or sufficient to make a stiff sponge. Beat thoroughly, cover and place sponge in moderately warm place (65 to 70 degrees) and let stand overnight. In the morning, add remainder of sugar and remainder of flour. Turn on to floured board and knead until dough becomes elastic to the touch and does not stick to board. Place in greased bowl, cover and let rise to double original bulk, then punch down. Let rise again, and, after punching down once more, divide

into pieces which will half-fill baking pans. Round these pieces into balls and let stand for a few minutes, then mould into loaves and place in greased pans. When double in bulk place in oven. (If the surface is pressed lightly with the finger, the slight depression thus made will remain when the loaves are ready for baking. Should the depression quickly disappear let the rising continue a little longer.) Bake in hot oven of 400 to 425 degrees for 35 to 60 minutes, depending on size of loaves.

NOTES

1. Instead of a dry yeast cake, 1 cup of home-made yeast or one-half a compressed yeast cake may be used.
2. The liquid used may be plain water, potato water or part milk and part water.
3. When potato water is used, 2 or 3 mashed potatoes may be mixed with water if desired.
4. When potato water is used, reduce salt by amount added when cooking potatoes.

BREAKFAST, PARKER HOUSE AND CINNAMON ROLLS, Etc., FROM BREAD DOUGH

4 BREAKFAST ROLLS

Take bread dough when ready to shape into loaves. Cut into pieces according to size of roll desired. Shape with thumb and finger into round balls. Place close together in

pan if preferred without a crust, or 2 inches apart on baking sheet if desired crusty. Brush with butter, cover closely and let rise until nearly three times their original size (about $1\frac{1}{4}$ hours). Bake in hot oven of 475 degrees for about 25 minutes.

PURITY FLOUR

The PURITY COOK BOOK

5 PARKER HOUSE ROLLS

Divide dough into pieces and round into balls as described under Breakfast Rolls. Brush lightly with butter, cover and let stand for 10 minutes; then crease across centre with knife handle, brush one half with butter and fold other half over. Cover and let rise in warm place until twice original size (about 45 minutes); then bake for 15 minutes in hot oven of 475 degrees.

6 CINNAMON ROLLS

Turn bread dough, when ready to shape into loaves, on to baking board and roll out to a thin sheet. Spread lightly with melted butter, sprinkle with mixture of cinnamon and sugar ($\frac{1}{4}$ cup sugar to 1 teaspoon cinnamon) and roll up like jelly roll. Cut into 1-inch slices and place close together, flat side down, in well-greased pan. Cover and let rise until very light (about $1\frac{1}{4}$ hours); then bake in moderate oven of 375 degrees for 20 minutes. As sugar burns easily protect the bottom of the pan from the heat.

7 BREAD STICKS

Method:—Take ordinary bread dough when it is ready to shape into loaves. Cut into pieces and roll under hands to about 4 inches long and thickness of a lead pencil; let rise until light, then bake in hot oven of 425 degrees until golden brown. When nearly baked glaze with white of egg.

8 CHELSEA BUNS

Take desired quantity of bread dough, when ready to shape into loaves, and roll to $\frac{1}{4}$ -inch thickness. Spread with mixture of 3 tablespoons butter, softened, $\frac{1}{3}$ cup currants, 2 teaspoons cinnamon and $\frac{1}{2}$ cup brown sugar. Roll like a jelly roll and cut in slices 1-inch thick. Place in well-greased biscuit or muffin pans, flat side down, let rise again until very light, then bake in moderate oven of 375 degrees for 30 to 35 minutes. As sugar burns easily, protect bottom of pan from heat.

9 DINNER ROLLS

2 tablespoons white sugar
 $\frac{1}{2}$ teaspoon salt
 $\frac{1}{2}$ cup scalded milk
 $\frac{1}{2}$ compressed yeast cake dissolved in
2 tablespoons lukewarm water
2 cups Purity Flour
2 tablespoons melted butter
1 egg
Grated rind of lemon

Method:—Add sugar and salt to milk; cool to lukewarm; then add dissolved yeast and $\frac{3}{4}$ cup flour. Cover and let rise until 3 times original bulk; then add butter, well-beaten egg, grated lemon rind and $1\frac{1}{4}$ cups flour. Let rise again until 3 times its bulk; roll to $\frac{1}{2}$ -inch thickness. Shape with biscuit cutter and place on buttered pans close together. Let rise again until double in bulk, then bake in moderate oven of 375 degrees for 20 to 25 minutes. These rolls may be ready to serve in 3 hours if $1\frac{1}{2}$ yeast cakes are used.

TEA ROLLS

2 tablespoons shortening
 $\frac{1}{2}$ cup scalded milk
1 tablespoon white sugar
1 compressed yeast cake
 $\frac{1}{2}$ cup tepid water
3 cups Purity Flour
1 teaspoon salt

Method:—Add shortening to milk and let cool to lukewarm. Dissolve sugar and yeast in water and add to milk. Beat in one-third of flour, using a strong rotary egg beater, and beat at least 4 minutes; then add remainder of flour with salt and knead thoroughly. Roll $\frac{1}{4}$ inch thick and brush lightly with melted butter; cut with biscuit cutter, crease and fold over into pocket shape, set to rise in warm place for 2 hours; then bake 15 minutes in hot oven of 400 degrees. (This makes 2 dozen rolls.)

11 WHOLE WHEAT OR GRAHAM BREAD

1 cake compressed yeast
1 cup lukewarm water
 $\frac{1}{2}$ tablespoon salt
2 tablespoons white sugar or $\frac{1}{4}$ cup molasses
 $5\frac{1}{2}$ cups Purity Whole Wheat Flour or Purity Graham Flour
2 tablespoons shortening
1 cup scalded milk (cooled)

Method:—Dissolve yeast in $\frac{1}{2}$ cup of lukewarm water. In remaining lukewarm liquid dissolve salt and sugar, or add molasses (if used); then add yeast and mix in sufficient flour to make soft batter. Add melted shortening, and beat well. Mix in enough flour to produce a slack dough, but not sticky. Turn

out on to floured board and knead well. Place in greased bowl and set aside to rise until double the original bulk; then punch down. Let rise again, punch down and divide into pieces, which will half-fill bread pans. Round pieces into balls and let stand for a few minutes. Mould into loaves and place in greased pans. Cover and keep in warm place while rising. Let rise until light (avoid letting loaves rise too high before placing in oven, as they are liable to fall). Bake in hot oven of 400 to 425 degrees for 40 to 60 minutes (according to size of loaves).

NOTE:—Purity Flour may be used with Whole Wheat or Graham Flour in above recipe, proportions to be governed by individual taste.

12 BROWN BREAD FROM AN OVERNIGHT SPONGE

To an overnight sponge, made as described under White Bread, add 2 tablespoons of white sugar and sufficient Purity Whole Wheat Flour or Purity Graham Flour to make a dough soft enough to be conveniently handled. If desired sponge may be divided and part used for white bread and part for brown. After dough thus made has risen once, divide, mould into loaves and place in pans. Cover and set in warm place to rise until double in bulk, then bake in hot oven of 425 degrees for 40 to 60 minutes, according to size of loaves.

Add remaining liquid, sugar, shortening, Purity Flour, balance of rye flour, and salt. Mix and knead thoroughly and let stand 20 minutes. Mould into loaves and place in greased pans; cover and let rise in warm place for 40 minutes, or until they rise one-third their bulk. Bake in hot oven of 400 degrees for 40 to 60 minutes, according to size of loaves. When taken from oven, brush with water.

14 HONEY AND ORANGE BREAD

3 cups Purity Flour
4 teaspoons baking powder
 $\frac{1}{2}$ teaspoon soda dissolved in

 $\frac{1}{4}$ teaspoon salt - 1 cup honey
1 cup milk - $\frac{1}{2}$ cup walnuts, chopped
 $\frac{1}{4}$ cup water - 1 egg
Skins of 3 oranges

Method:—Put orange skins through coarse grinder of food chopper, then boil 30 minutes with 1 teaspoon salt and sufficient water to cover. Drain, then add honey and the $\frac{1}{4}$ cup water; simmer until fairly thick. Beat egg, add milk, and add to flour sifted with baking powder and remainder of salt. Beat in honey and orange mixture while it is still warm; add nuts and dis-

solved soda, and mix well. Turn into 2 well-greased bread pans (medium size) and let stand in warm place for 20 minutes, then bake in moderate oven of 350 degrees for $1\frac{1}{2}$ hours. (Use thick-skinned oranges.)

15 ALMOND RING

$2\frac{1}{2}$ cups of scalded milk
2 compressed yeast cakes
 $\frac{1}{2}$ cup warm water - $\frac{2}{3}$ cup Purity Flour
3 egg yolks - 4 tablespoons melted butter
6 tablespoons sugar - 1 teaspoon salt
1 cup chopped raisins
 $\frac{1}{2}$ cup of halved blanched almonds
Enough Purity Flour for kneading
Corn starch for glazing

Method:—1. Scald milk and allow to stand until tepid. 2. Soften the yeast cakes in warm water. 3. Add to the milk. 4. Beat in the flour. 5. Set in a warm place to rise until double in bulk or until light. 6. Add raisins, salt, sugar and butter and the egg yolks well beaten. 7. Stir thoroughly and beat in flour enough to knead. 8. Let rise again, when double in bulk cut in two and shape into two long rolls, and these into circles. 9. Oil a cookie sheet and place the rolls on it. 10. Let rise again until light. 11. Bake until almost done in a moderate oven 350 degrees. 12. Brush over with a corn starch glaze made by dissolving a teaspoon of corn starch in a quarter of a cup of cold water. Bring it to a boiling point. Spread this over the circles, then sprinkle with almonds and 2 tablespoons of granulated sugar. 13. Place in the oven to set the glaze and finish cooking.

SWEET DOUGH FOR COFFEE CAKE, CINNAMON ROLLS, LUNCHEON AND TEA ROLLS

16 BASIC RECIPE

1 cake compressed yeast
2 cups scalded milk (cooled)
 $\frac{1}{3}$ cup white sugar
 $\frac{1}{3}$ cup shortening
1 egg
1 teaspoon salt
 $5\frac{1}{2}$ to 6 cups sifted Purity Flour

Method:—Dissolve yeast in lukewarm milk. Cream sugar and shortening, add beaten egg, milk and yeast mixture, and salt. Add sufficient flour to make dough soft enough to be conveniently handled and knead until smooth. Place in greased pan; cover and set in warm place to rise until double in bulk (about 2 hours). To make cakes and rolls proceed as follows:

17 COFFEE CAKE

Remove dough from pan and roll to $1\frac{1}{2}$ inches thick. Cut into desired shapes. Let rise again until double in bulk. Brush tops with melted butter or white of an egg; sprinkle on this a mixture of cinnamon and sugar ($\frac{1}{4}$ cup white sugar to 1 teaspoon cinnamon) and a few nuts finely chopped. Bake in a moderate oven of 375 degrees for 30 to 35 minutes.

18 BRAIDED COFFEE CAKE

Divide dough into 3 equal parts, shaping each with palms of hands until they are about $1\frac{1}{2}$ inches thick and 20 inches long. Press ends of strands firmly together and braid

lengths. Bring these together to form a circle. Place in greased pan and set in warm place to rise until dough has doubled in bulk. Brush with melted shortening. Sprinkle with a mixture of 2 tablespoons white sugar, 1 teaspoon cinnamon and 2 tablespoons chopped nuts. Bake in a hot oven of 400 degrees for 20 minutes.

19 CINNAMON ROLLS

Remove dough from pan and roll to $\frac{1}{4}$ -inch thickness. Spread on it 3 tablespoons butter and sprinkle over this a mixture of $\frac{1}{4}$ cup brown sugar and $1\frac{1}{2}$ teaspoons cinnamon. Roll like jelly roll and cut in slices 2 inches thick. Lay flat side down on well greased pans. Cover and let rise until double in bulk. Bake in moderate oven of 375 degrees for 30 to 35 minutes. As sugar burns easily, protect bottom of pan from heat. Remove from pan while hot.

20 LUNCHEON AND TEA ROLLS

Cut dough into small, oblong pieces for luncheon rolls and smaller pieces for tea rolls, shaping with thumb and finger into desired shapes. Place about 2 inches apart on baking sheet, brush with butter, cover closely and let rise until nearly 3 times their original bulk. Bake in hot oven of 475 degrees for 15 minutes.

21 ICE BOX YEAST ROLLS

1 cake compressed yeast
 $\frac{1}{2}$ cup lukewarm water
 $\frac{1}{2}$ teaspoon white sugar
 $\frac{1}{2}$ cup shortening
 $\frac{1}{2}$ cup white sugar
1 egg
2 cups scalded milk
 $1\frac{1}{2}$ teaspoons salt
8 cups sifted Purity Flour

Method:—Dissolve yeast in lukewarm water; stir in $\frac{1}{2}$ teaspoon sugar. Cream shortening with $\frac{1}{2}$ cup sugar and add beaten egg, scalded milk (which has been cooled to room temperature), salt, and finally the dissolved yeast cake. Stir in sifted flour a little at a time, until dough is stiff enough to knead. Knead on floured board for 10 to 15 minutes or until smooth and elastic. Form dough into ball, place in a large greased bowl; brush the top with melted shortening to prevent a crust forming; cover and keep in a warm place (not hot) until dough doubles in size (3 to 4 hours). Turn out and knead again. Form into ball, return to greased bowl, brush again with melted shortening, cover and set in refrigerator until required; then roll dough like a jelly roll and cut into $1\frac{1}{2}$ -inch slices. Place on flat side in greased muffin tins, let rise until double in bulk and bake in hot oven of 400 degrees for 20 minutes.

NOTE:—This dough may be kept for a week in a refrigerator, though it may require kneading down occasionally.

22 COFFEE CAKE

(Sponge)

1 cup lukewarm water
1 teaspoon white sugar
1 teaspoon salt
2 cups Purity Flour
 $\frac{1}{2}$ dry yeast cake dissolved in $\frac{1}{4}$ cup lukewarm water

(Dough)

2 tablespoons white sugar
 $\frac{1}{2}$ teaspoon salt
 $\frac{1}{2}$ cup lukewarm water
1 tablespoon butter
2 eggs
About 4 cups Purity Flour

Method:—Mix sponge ingredients, beat well and let stand in warm place over night. Dissolve sugar and salt in water and add to fermented sponge; then mix in butter and beaten eggs and add sufficient flour to make soft dough. Form into desired shapes and place in shallow pans. Brush top with melted butter. Sprinkle with white sugar and cinnamon ($\frac{1}{4}$ cup sugar to 1 teaspoon cinnamon). Let rise until light. Bake in hot oven of 400 degrees for 20 minutes.

NOTE:—If 1 cake of compressed yeast, instead of $\frac{1}{2}$ dry yeast cake, is used in above method, it will not be necessary to let stand overnight.

23 HOT CROSS BUNS (1)

1 cake compressed yeast
2 cups scalded milk (cooled)
 $5\frac{1}{2}$ to 6 cups sifted Purity Flour
 $\frac{1}{3}$ cup butter
 $\frac{1}{2}$ cup white sugar
2 eggs
1 teaspoon salt
 $\frac{1}{2}$ cup currants
 $\frac{1}{2}$ teaspoon cinnamon (if desired)

BISCUIT DOUGH RECIPES

GENERAL RULES

1. Collect ingredients and grease or oil pans.
2. Combine dry ingredients, carefully sifting flour, before measuring. Sift again to distribute baking powder and salt evenly through flour.
3. Measure shortening and cut into dry ingredients with knife or spatula, or work in with finger-tips if preferred.
4. Handle batter and dough as little as possible, as too much rolling and mixing develops gluten and tends to toughen the finished product.
5. Biscuits and muffins require a hot oven—about 475 degrees.

43 BASIC RECIPE

2 cups Purity Flour
1 teaspoon salt
4 teaspoons baking powder
1 tablespoon lard or shortening
1 tablespoon butter
 $\frac{3}{4}$ cup milk and water (half of each)

SOUPS

The main reasons for serving soup are: First, as an appetizer to stimulate appetite and aid digestion. Secondly, as an actual part of the meal, in which case it must have many nutritive qualities, for therein lies the real value of soup.

The first, or appetizer group, includes clear soup, consomme and bouillon and should be served as first course of a heavy dinner or luncheon. The second or nutritive group includes cream soups, bisques and chowders served as a main course for luncheon or supper.

FISH SECTION

SUGGESTIONS IN SELECTING, PREPARING AND COOKING OF FISH

Because fish spoils quickly it is necessary that it be used when fresh and in season. Freezing reduces flavor and changes texture; flesh of fish is not as firm as when fresh and breaks easily during cooking.

For baking, select medium-sized fish, as salmon-trout, white fish, haddock, pickerel, or a thick piece of large fish such as salmon, halibut or cod.

For boiling or frying, use small fish such as speckled trout, perch or bass, or steaks of large fish.

For invalids, select fish which are not too rich, such as white fish, halibut, bass or trout. They should be broiled or baked.

The flesh should be firm, should show no discoloration, and should not have strong odor. The eyes should be clear, the gills red and scales bright.

To remove earthy taste from fresh-water fish, especially bass, sprinkle with salt and let stand a few hours or overnight. Rinse off and dry. Fresh-water fish should never be soaked in water except when frozen, when they may be placed in ice-cold water to thaw just before cooking. Salt fish may be soaked overnight in cold water (skin side up) changing water once or twice if very salty.

To remove scales, hold fish by tail, loosen scales with knife, keeping knife close against the fish to prevent scales from flying. Remove fins. Remove head and tail (these are sometimes left on if fish is to be baked). If head is left on, remove eyes with a sharp knife. Open abdomen, clean out thoroughly, wash inside and out, sprinkle inside of fish with salt, then wash thoroughly with cold water and dry.

To bone fish, remove large bones near head, then slip a sharp knife under flesh close to back bone. Work flesh from bones on one side from head to tail, then from the other side and remove all small bones.

Fish should always be well cooked, being both unpalatable and unwholesome when underdone. It is cooked when flesh becomes flaky and separates easily from the bone. One of the most essential things in serving fish is to have everything hot and quickly dished so that all may go to the table at once. Method of cooking which retains most nourishment is broiling.

VEGETABLES

Vegetables contain water, mineral salts and health-promoting vitamins, and give a wide variety of flavor to our meals. They should, therefore, form a large part of our daily diet.

Because Vitamine C is affected by cooking, except in tomatoes, it is wise to include a raw vegetable in our meals each day, such as cabbage or salad greens.

When boiling vegetables, allow 1 teaspoon salt to each quart of water. Use as little water as is possible without burning, except in strong-flavoured vegetables as cabbage, turnips or onions. Potatoes also require a large amount of water.

Salt aids to retain flavor and color of green vegetables and should be added to water before vegetables are boiled, except in cases where vegetables are wilted and liable to be tough. In such cases, it should be added a few minutes before vegetables are drained. In the case of potatoes either white or sweet, which are usually tender, they are best boiled in salted water.

The use of baking soda in the cooking of vegetables is not recommended, as it has a tendency to destroy the vitamine content.

Retain vegetable stock for soup. When adding butter to vegetables, vegetables should be boiled and drained, then returned to stove, when butter and seasonings should be added and pan shaken so that butter will coat the vegetables.

111 POTATOES BOILED IN SKINS

Wash potatoes thoroughly, boil in water salted in proportion of 1 teaspoon of salt to 1 quart of water for 20 to 30 minutes, or until they can be pierced easily with a fork. When cooked, drain, return to fire and shake for a few minutes until dry and mealy.

112 BAKED POTATOES

THE SELECTION AND COOKING OF MEATS

BEEF.—Should be firm, of fine texture, bright red in color and well coated with fat. The fat should be firm and yellow in color.

VEAL.—Should be pink in color and is usually less firm than beef. Fat should be white. If used too young it is watery and flabby.

MUTTON AND LAMB.—Mutton should be dull red, firm and streaked with firm white or slightly yellow fat. Lamb should be pink with more red color in the bones than in mutton, with fat hard and white. Outside skin should come off easily.

PORK.—Should be pink in color, with white fat. Never use pork that has dark spots in it.

All paper wrappings should be removed from meat, as paper absorb meat juices. Meat should be kept in a cool place and wiped with a damp cloth (not washed) before cooking.

ROASTING OR BAKING.—Beef, Pork, Lamb and Mutton should be baked or roasted in an uncovered roaster, as these meats are more palatable when cooked in the oven's dry heat without a lid to retain the steam of the pan. In the case of veal, poultry and game, lid should be left on the roaster. Very lean meat is improved by having thin slices of fat meat, either bacon, pork, or its own fat, laid over the surface at first until there is sufficient dripping with which to baste. Oven pan should be hot at first, then heat gradually reduced. Time of roasting varies with the kind of meat.

BRAISING.—Braising is particularly adapted for meats that are lacking in flavor or are tough. A deep pan with a close-fitting cover is necessary. The most stubborn pieces will yield to the persuasion of a braising pan and become tender, especially if a few drops of lemon juice or other acid be added to the gravy in the pan.

BROILING.—Broiling is cooking by direct exposure to heat. The surfaces are seared by exposing the meat to great heat at first, thus preventing the juices from escaping.

PAN-BROILING.—Heat a cast-iron or steel frying pan to a blue heat. Season the meat and lay in the pan just long enough to sear thoroughly on one side, then turn and sear the other side, to keep the juices from escaping. Reduce heat and cook more slowly until meat is cooked.

FRYING.—To fry, is to cook in a hot, shallow pan with a little fat, browning first on one side and then the other.

The PURITY COOK BOOK

BOILING.—In boiling, as in roasting, the general principle is to sear or to subject the meat to a high degree of heat at first until a layer of albumen hardens over the entire surface. The temperature should then be dropped much below boiling point and kept there until the gelatine and connective tissues are softened to almost the point of dissolving. Let the meat partly cool in the liquid, and if the slices are served on very hot plates they will be juicy, tender and well-flavored.

LARDING.—Use a piece of salt pork fat. Shave off the rind as closely as possible, cut fat into $\frac{1}{4}$ inch slices and cut again into $\frac{1}{4}$ inch strips. With a larding needle draw these strips into the meat, leaving the stitches evenly distributed and in alternate rows until the whole surface is covered.

NOTE.—For meats for stews where juices are to be retained in the meat, salt should not be added until they are nearly cooked. For roasts and broiled meats seasoning should not be added until they are thoroughly seared and the juices sealed in, as salt extracts the juices from the meat.

168 ROAST BEEF

A roast with ribs left in is known as a "standing" roast. A roast with ribs removed, and meat rolled and tied, is known as a "rolled" roast. The tip of the sirloin is considered one of the best pieces for roasting. Wipe with damp cloth. Place roast on rack in roasting pan, skin side down, dredge with Purity Flour, and place in hot oven to sear; then reduce the heat. Add water to cover bottom of pan and baste every 15 minutes. When half-cooked, season with salt and pepper and turn with skin side up for final browning. Let water cook away when meat is nearly cooked. Remove meat to a hot platter, when cooked, and serve with brown gravy or Yorkshire pudding.

169 BROWN GRAVY

For 2 cups gravy leave 2 tablespoons fat in the pan; add 2 table-

spoons Purity Flour, stir together over heat until brown; then add 2 cups boiling water or stock, stirring rapidly until smooth. Season with salt and pepper and strain. One tablespoon chopped onion may be browned in fat before adding flour.

170 YORKSHIRE PUDDING

3 eggs
1 teaspoon salt
2 cups milk
 $\frac{2}{3}$ cup Purity Flour

Method:—Beat eggs until light; add salt and milk. Pour half of liquid over flour and stir to smooth paste, then add remaining half of liquid and beat well with strong rotary egg beater. Pour into hot roasting pan under meat and bake in hot oven of 475 degrees for 15 to 20 minutes.

171 POT ROAST OF BEEF

Sear meat on both sides, then reduce heat and turn every 2 minutes until cooked. Season when partly cooked.

173 FRIED BEEFSTEAK

Wipe meat with damp cloth and trim off extra fat; place in very hot, slightly greased frying pan. Sear on both sides, then reduce heat, turning every two minutes until cooked. Season with salt and pepper when partly cooked. While meat is cooking pour off fat that collects in pan. Serve with brown gravy, mushroom sauce or fried onions.

174 PLANKED SIRLOIN STEAK

Slice sirloin steak about 1 inch thick and wipe with damp cloth; sear in greased, hot, iron pan, then place on oiled oak plank and cook 12 minutes in hot oven. Method:—Trim bone and extra fat from meat, wipe with damp cloth and place on board. To make more tender pound with wooden potato masher or edge of heavy plate. Mix crumbs, onion and seasonings, add melted butter and spread over meat. Roll up and tie in shape. Place in roasting pan and pour 2 tablespoons dripping melted in a cup of boiling water around meat. Cover tightly. Cook in moderate oven of 350 degrees 1½ to 2 hours. Uncover the last half hour of cooking. Serve with brown gravy.

176 BEEF STEW WITH DUMPLINGS

1 lb. rump steak
¼ cup Purity Flour
½ teaspoon salt
¼ teaspoon pepper
4 cups potatoes, diced
1 cup carrots
1 cup turnips
1 onion, sliced

Method —Cut portion of fat off meat in small pieces and heat in frying pan; cut meat into 1½-inch cubes, dredge with flour seasoned with salt and pepper and sear in fat in frying pan, stirring constantly. When well browned place in kettle, rinse frying pan with 1 cup boiling water and add to contents of kettle.

186 CALVES' LIVER AND BACON

1 lb. calves' liver
¼ cup Purity Flour
1½ teaspoons salt
¼ lb. bacon

PURITY FLOUR

• BEST FOR ALL YOUR BAKING •

The PURITY COOK BOOK

Method:—Slice liver $\frac{1}{4}$ -inch thick. Roll slices in flour sifted with salt. Fry bacon until crisp, then arrange on platter and keep hot. Fry liver in bacon fat for 5 to 10 minutes, turning frequently. Arrange in centre of platter with bacon. (Prepared by same method, calves' liver and bacon may be broiled for same length of time.)

Calf and chicken livers are very tender and should be cooked quickly, either by pan or oven broiling, or frying. Beef, pork and lamb livers are just as delicious, but being less tender should be cooked more slowly and for a longer time, as in braising, stewing or baking. Liver needs only to be wiped with a damp cloth before using. With heavier livers remove outer skin and any large veins. Beef, pork and lamb livers are made more tender if soaked overnight, or several hours before cooking, in mixture of 3 parts of vinegar and 1 of olive oil.

187 STUFFED LIVER ROLLS

1½ lbs. thinly sliced calves' liver
½ teaspoon each, salt and pepper
4 cups soft bread crumbs
1½ cups drained crushed pineapple
1½ tablespoons minced green pepper
1 small onion, minced
½ cup pineapple juice

Method:—Scald liver with boiling water; dry with towel. Sprinkle with salt and pepper. Combine crumbs, pineapple, green pepper, onion and pineapple juice, and spread on slices of liver. Roll each one up and fasten with toothpick.

Fry in hot fat until brown, add 2 cups boiling water and simmer until tender. Serve with gravy made from liquid and dressing that remain in pan.

188 BROILED SWEETBREADS

Parboil sweetbreads and split crosswise, sprinkle with salt and pepper. Broil under gas flame, or fry in hot, greased frying pan for 5 minutes. Brush with butter and garnish with slices of lemon and parsley.

189 ROAST LEG OF LAMB

Remove thick skin, wipe meat, place on rack in roasting pan, dredge with Purity Flour, and place in hot oven. Sear on all sides, then reduce heat. Add 1 cup boiling water, baste every 15 minutes with liquid in pan. Season when half-cooked. Serve with brown gravy and mint sauce or currant jelly.

Leg of lamb may be boned, stuffed and roasted, using the following dressing:

Dressing

2 cups stale bread crumbs
⅓ cup melted butter
1 tablespoon green pepper, chopped fine (optional)
½ teaspoon each, salt and pepper
1 tablespoon chopped parsley
1 teaspoon onion pulp
1 teaspoon poultry seasoning

Method:—Mix together and press into opening left by removal of bone from lamb; sew cut edges of meat together with strong, double thread, and roast.

190 BREADED LAMB CHOPS

2 tablespoons butter
4 tablespoons Purity Flour
 $\frac{1}{2}$ teaspoon salt
Few grains cayenne
1 cup milk
 $\frac{1}{2}$ cup chopped ham
6 lamb chops
Egg crumbs

Method:—Make thick white sauce by melting butter, blending in flour and seasonings and adding milk gradually. Bring to boiling point, stirring constantly, and cook until thick; add ham and cool. Trim fat from chops and pan-broil or fry; season and cool. Cover with layer of sauce. When set, dip in crumbs, in beaten egg, and in crumbs again; brown in deep fat. Garnish with parsley and serve with tomato sauce (see Recipe No. 688).

191 ROAST PORK

Trim and wipe meat. If used with skin on, score it in inch squares, taking care to cut only through skin. Make a cut just below the knuckle with a boning knife. Slide the knife up along the bone and turn outward, making a half-dozen cuts two-thirds of the way to the skin; fill cuts with dressing. Sprinkle with salt and pepper, place on rack in roasting pan and dredge with Purity Flour. Half an hour before serving sprinkle with 1 tablespoon cracker crumbs seasoned with pepper, salt and sage. Serve with apple sauce (See Recipe No. 224).

1 small onion
2 egg yolks
2 tablespoons butter
1 cup grated bread crumbs

192 ROAST SPARERIBS

Choose a long piece of sparerib. Wipe carefully and sprinkle with a little salt and pepper. Place a small piece of sparerib on bottom of baking pan and form a roll around it, using the large piece of sparerib. Fill cavity in centre with dressing. Bake in moderate oven of 375 degrees for about 1 $\frac{1}{2}$ hours.

193 BAKED PORK TENDERLOIN

4 large pork tenderloins

194 PORK CHOP OR STEAKS

Lay chops or steaks on hot frying pan and fry slowly on both sides to rich brown. Serve at once, or, if thickened gravy is preferred, remove most of fat which fried out of pork from pan; add 2 tablespoons Purity Flour and pour in boiling water, gradually; cook until thick, season, pour over chops and serve.

195 PORK PIE

Line sides of deep pie dish with pastry (not too rich). Place following layers in rotation: bacon, potatoes, and onions thinly sliced, and lean fresh pork cut into small pieces. Season with pepper, salt and sage. Fill dish with gravy left from roasts, or with water thickened with Purity Flour (2½ tablespoons flour to 1 cup water) with small piece of butter added. Cover with pastry and bake in moderate oven of 325 degrees about 1½ hours. (Cover pie with thick brown paper if it gets too brown.)

196 SPARERIBS AND SAUERKRAUT

Place sauerkraut in bottom of bake dish. Lay spareribs on top and almost fill dish with water. Bake about 3 or 4 hours. Place whole apples on top, ½ hour before ribs are cooked, to flavor. Shoulder cut of pork may be used instead of ribs.

197 PORK CHOPS EN CASSEROLE

Cut bone away from as many pork chops as required. Dip them in thin mixture of Purity Flour and milk and fry until brown. Season, place in casserole and pour over them 1 can of peas, from which the liquid has been drained, and 1 can of tomato soup. Bake in a moderate oven of 350 degrees for 45 minutes.

198 FRIED SALT PORK

Remove rind and cut pork in ¼-inch slices. Freshen if very salty and fry slowly and evenly until dry. Use as a garnish for fish, fish balls, or as a lunch or breakfast dish with baked potatoes and a white gravy made in same manner as white sauce (see Recipe No. 680), substituting fat from the pork for butter.

199 SAVOURY BAKED HAM

1 10-lb. ham
1 stick cinnamon
1 tablespoon cloves (whole)
Garlic (optional)
2 tablespoons vinegar
1 cup white sugar
1 cup brown sugar

mon, blended together. Place in baking pan with $\frac{3}{4}$ cup water and bake in moderate oven of 325 degrees until brown. Serve with jelly.

200 BAKED VIRGINIA HAM

Cover ham with cold water in deep pot and bring to boiling point quickly; then reduce heat and simmer 2 or 3 hours or until tender. Place in roasting pan with $\frac{1}{2}$ cup of water and brown in moderate oven of 350 degrees for 25 to 30 minutes.

201 VARIED COMBINATIONS OF MEATS AND FRUITS

Cover boiled ham with brown sugar and slices of pineapple. Place in roasting pan with $\frac{1}{2}$ cup water and brown in moderate oven of 350 degrees.

To mashed bananas add a few drops lemon juice, and spread on pork tenderloin which has been sprinkled with a little salt.

The **PURITY** COOK BOOK ---

POULTRY AND GAME

Poultry includes all domestic birds suitable for food except pigeon and squab, *i.e.*, turkey, duck, goose, chicken, etc. Game includes such birds and animals as quail, pigeon, squab, wild duck, partridge, grouse, deer, rabbit, etc. Game meat is of dark color, partridge and quail being exceptions. The secret of cooking game is constant basting.

POULTRY.—Always use young poultry, except for soup and stock. If young, breast bone and tips of wings will be soft, the beak brittle, spurs short, legs smooth, feathers downy and there will be no coarse hairs. If in good condition, flesh will be firm, breast plump, and there will be some fat. If too fat, flavor is rank and flesh greasy. Poultry should be cooked while fresh, the feet should be limp and moist, and the eyes full. When flesh is discolored or has begun to turn green, it should be rejected. White-legged fowl should be chosen for boiling, as they have the whitest flesh. Those with yellow or black legs are better for roasting, as the flavor is richer.

GAME.—Most of the tests for the age of poultry can be applied to game, but it should be bought in its feathers always, never after it is plucked. Game is greatly improved in tenderness and flavor by hanging. The length of time for hanging depends upon the weather and the larder. In cold, dry, windy weather it will keep for some weeks, according to the taste of the consumer; but if the atmosphere is moist and warm it decomposes quickly and becomes unwholesome and unfit to eat. Birds should be hung by the neck and sprinkled with pepper to keep away the flies—in a food safe in open air, if possible.

To remove "gamey" taste, soak game in salted water for 24 hours.

To remove pin feathers and down.—Clip tips of wings, and remove feathers. Melt paraffin and apply with a clean paint brush to all parts of bird. Let paraffin harden, then pull it off, thereby removing down and feathers.

205 ROAST TURKEY

Singe, dress (reserving giblets for gravy) and wash turkey. Wipe with damp cloth. Pull skin of neck back and cut off neck close to body (skin will turn back and keep in stuffing). Cut off tips of wings. Fill turkey with chestnut or oyster dressing. Sew up opening, then tie in shape with wings and legs close to body. Rub entire surface with salt, brush with melted butter and dredge with Purity Flour. Place in roasting pan in hot oven of 475 degrees for 10 to 15 minutes. Add 1 cup of water, then reduce temperature to 375 degrees and cook until tender (allowing 15 to 20 minutes per pound). Baste every 20 minutes with fat in pan, adding more hot water if necessary.

206 CHESTNUT DRESSING

3 tablespoons butter
 $\frac{1}{4}$ cup hot milk
3 cups bread crumbs
1 teaspoon salt
 $\frac{1}{4}$ teaspoon pepper
2 cups boiled French chestnuts

Method:—Add butter to hot milk; then add bread crumbs, salt and pepper and finely chopped chestnuts. Mix thoroughly.

207 OYSTER DRESSING

3 cups bread crumbs
1 teaspoon salt
 $\frac{1}{8}$ teaspoon pepper
Few drops onion juice
1 tablespoon chopped parsley
24 oysters
2 tablespoons butter
 $\frac{1}{4}$ cup oyster juice

Method:—Mix crumbs, salt, pepper, onion juice and parsley; add

oysters. Add butter to hot oyster juice and add to bread mixture. Mix thoroughly.

208 GIBLET GRAVY

Boil giblets in water until cooked. Pour off fat from pan in which turkey has been roasted, leaving 4 tablespoons of fat in pan. Add 3 tablespoons Purity Flour and stir until it browns. Measure water in which giblets were cooked and add enough water to make 3 cups of liquid. Add to browned flour and stir until smooth and thick. Season with salt and pepper. Reheat and serve.

NOTE:—Liver, gizzard and heart, chopped finely, may be added to gravy.

209 BONED TURKEY

Select turkey which has not been frozen as freezing makes skin tear easily. Singe and wash turkey, but do not draw it. Turn on its back and cut down breast bone with sharp, pointed boning knife; begin at neck and run knife between flesh and bones, being careful not to pierce the skin; press off flesh with thumb and finger. Do not remove small bone at rump or bone at end of wings. Work first on one side, then the other, finally turning bird inside out by removing leg bones, leaving skeleton. Lay bird with breast right side down and fill with stuffing for boned turkey. Skewer into shape; steam for 3 hours, then roast for 1 hour in moderate oven of 375 degrees. When cold, garnish with cranberry jelly.

Salads

The PURITY COOK BOOK

SALADS

Much progress has been made in the last few years in planning or choosing meals which will keep us fit. The vitamine content of our daily diet is being constantly stressed by scientists, and we have learned that Vitamine C, which cooking destroys, is prevalent in abundance in raw fruit and vegetables. At least once daily, according to good health rules, salads should be served to every family.

Successful salad making is governed by the following general rules:

1. Ingredients should be thoroughly chilled. When gelatine or jelly powder is used, other ingredients should not be added until liquid is just beginning to jell; otherwise they will sink to bottom or float on top and spoil the appearance of the salad.
2. Salad plants and green vegetables should be clean, fresh, crisp and dry.
3. Ingredients should be cut in attractive shapes and in suitable sizes. If too large they are not seasoned with the dressing, and if too small they break up and lose their identity.
4. Add enough dressing to season well, but not enough to make salad too moist. Salad mixtures should be cold and moist but with no excess liquid. A salad that is "watery" is most unpalatable, and the liquid dilutes the dressing.
5. Dressing should not be added to greens until time for serving, as it wilts them.
6. Combine ingredients with as little handling as possible.

235 POTATO SALAD

3 eggs, boiled hard, diced
1 medium sized onion, chopped finely

salt and pepper and serve on lettuce leaves. For variation add diced cucumbers, radishes, cooked beets, chopped stuffed olives, green pepper, pimento or parsley.

236 SPINACH SALAD

After packing freezer wipe off cover, remove crank and cover, pour in mixture (never fill can more than $\frac{2}{3}$ full), adjust cover and top. Let stand until thoroughly chilled; turn very slowly until mixture begins to turn hard, then increase speed.

TO PACK FROZEN MIXTURE:

When mixture is stiff, drain water from tub; remove crank, wipe off cover and remove dasher. Scrape mixture down from sides of can and pack down well with spoon. Adjust cover and insert cork. Repack tub with packing mixture and cover with heavy sack or newspapers.

TO MOULD FROZEN MIXTURES:

Scald mould, chill thoroughly; pack solidly with frozen mixture. Level off top, cover with waxed paper and adjust lid. Pack well with packing mixture, cover and let stand several hours.

CAKE MAKING

Women who have made for themselves an enviable reputation as cake bakers often find, on moving to a different part of the country, that, to begin with at any rate, their results are quite disappointing. The reason for this is that many cake recipes require modification with changes in altitude and atmospheric conditions.

The recipes in this book are designed for average conditions. With increasing altitude, cakes require less leavening, and, therefore, slight reductions should be made in the amount of sugar and baking powder and also in the creaming time. At high altitudes somewhat lower oven temperatures should also be used. As sea level is approached, slightly increased amounts of sugar and baking powder may be used with advantage, and the shortening and sugar should be very thoroughly creamed.

The other factor for which compensation must be made is the humidity of the air. On the prairies, and especially in the mountains, flour dries out very fast and, to adjust for this when making cakes, extra liquid must be added.

Remember, when experimenting with any recipe, that it is best to make only one change at a time and to make the change a small one. If the cake is improved, a further modification in the same direction may be made; if not, a start should be made in some other direction.

If our readers will bear these points in mind it is believed that they will have little difficulty in adapting the following recipes to suit conditions prevailing in their locality.

GENERAL RULES

1. Have all necessary utensils and ingredients ready before beginning to mix cake, and make sure that oven is at proper temperature when cake is ready to be baked.
2. A round bottom bowl is the best type of mixing bowl.
3. A wooden spoon is more suitable for beating than a metal spoon, and is noiseless.
4. A wire beater should be used in beating egg whites.
5. Shortening for cake making must be of best quality.
6. Fine granulated sugar makes a finer textured cake than coarse granulated. If coarse granulated or brown sugar is used, it should be sifted and only the finer particles used.
7. Sift flour before measuring. After combining dry materials—flour, baking powder, salt and spices—sift again.
8. Break eggs carefully and in separating see that no particles of yolk are dropped into the whites. When yolks and whites of eggs are added separately, beat yolks until thick and lemon colored, then fold in egg whites, beaten until stiff.
9. Prolonged beating is the only way to secure fine-grained cake. Do not stir, but beat thoroughly, bringing the batter up from the bottom of the dish at every stroke, thus driving the air into the cells of the batter.
10. Fruits should be thoroughly cleaned—a good rule is to sprinkle them with flour, then rub with towel. (Cakes are sometimes made heavy by having moistened fruit added.) Fruits and nuts should be lightly dredged with flour before adding to other ingredients.
11. There are two types of cake, shortened (butter) cake and unshortened (sponge) cake. Grease cake pan, in which butter cakes are baked, with melted shortening. Fruit cakes should be baked in pans oiled and lined with wax paper. Pans for butterless cakes, such as sponge cake, should never be oiled or lined with paper. Butter cakes should

PURITY FLOUR

~ **BEST FOR ALL YOUR BAKING** ~

The PURITY COOK BOOK

remain in pan 5 minutes after removing from oven. Sponge cakes should be inverted over rack and allowed to stand until cool.

12. Test for oven without thermometer—if a piece of white paper turns a deep yellow in 5 minutes it is ready for butter cake—if it turns a light yellow in 5 minutes it is ready for sponge cake.
13. Do not open oven door until cake is set and do not jar oven while cake is baking.
14. When baked, cake shrinks from the pan, or if broom straw or bone knitting needle is inserted into the middle of cake and comes out perfectly clean, it is certain that cake is baked.

Defects

1. Falling or heavy product: Too little flour; too slow a fire; too much sugar or fat: uneven temperature of oven.
2. Coarse-grained cake: Too much shortening; careless mixing.
3. Cracks on top of cake: Too much flour; too hot an oven.
4. Uneven rising: Improper placing of cake in pan or in oven; too much flour; uneven heat of oven.
5. Rough edges: Too much sugar; too much fat; too little flour.

The **PURITY** COOK BOOK ---

MAKING PASTRY WITH PURITY FLOUR

Since Purity Flour was introduced to Canadian housewives twenty-seven years ago, progress has been made year by year in demonstrating to Canadian women that it can be used satisfactorily and economically "For All Your Baking."

Our Baking and Testing Department has proved conclusively that Purity Flour is an all-purpose flour—that a different brand of flour for pastry and cakes is not necessary. Thus, Purity should not be regarded as a "bread" flour. While its strong gluten content provides unusual expansion qualities, it has been proven that this same characteristic, while valuable for bread making, in no way interferes with the production of light, flaky pastry and without using extra shortening.

The formula as given in this section of the Purity Cook Book places emphasis on the amount of water to be used, and specifies the same quantities of flour and shortening as in ordinary pastry flour recipes. By keeping the dough at the crumbly stage, and by using a minimum amount of water, you will be rewarded with a flaky pastry, with a distinctive flavor imparted to it by the Western hard spring wheat, from which Purity Flour is milled.

Too much stress cannot be placed on the following quotation from the formula: "Add water gradually and mix thoroughly, using less than 1 cup of water, if possible."

A FEW PASTRY POINTERS

1. Handle dough as little as possible.
2. Blend ingredients quickly.
3. Make sure that shortening is blended properly. If shortening is too hard it will not blend properly with flour; if too soft and oily it will work into the flour too much and prevent flour from absorbing sufficient water to hold together when being rolled out.
4. Use *cold* water in order that shortening may remain firm during the blending process.
5. Have hot oven of 475 degrees.
6. Raw spots in pastry are due to faulty or improper heating of oven.
7. Pies may be washed with egg and milk or cream to give them a high gloss or rich color. It is advisable in making pies of the custard variety to wash the unbaked crust with white of egg to prevent crust from becoming soggy.
8. Prick top of crust of pie with a fork or cut slits in it with knife to prevent the steam condensing within and making the pastry soggy. One-crust pies, when cooked without filling, should also be pricked before being placed in oven.
9. Meringues for pastry should not be cooked too quickly or they will fall on being taken from the oven. Fillings should be cooled slightly before meringue is put on them or meringue will liquefy underneath.
10. If pastry is let stand overnight to ripen it improves the flavor and is more easily handled.

469 PURITY FLAKY PASTRY

3 cups Purity Flour
 $\frac{1}{2}$ teaspoon salt
1 cup shortening
1 cup cold water

Method:—1. Sift flour with salt, and cut in half the shortening until mixture is like fine meal; add water gradually, and mix thoroughly, using less than 1 cup of water if possible. 2. Turn out on board covered with very light sifting of flour and roll to $\frac{1}{4}$ -inch thickness. 3. Spread remaining shortening on rolled dough; fold dough over 3 times and roll again to required thickness. Always keep dough at the crumbly stage. A dough heavy with water will not flake up in the oven. 4. Bake in hot oven 475 degrees. (If richer pastry is desired, use half butter and half shortening or more shortening.)

470 A DIFFERENT WAY TO MAKE PURITY PASTRY

2 cups Purity Flour
 $\frac{1}{2}$ teaspoon salt
 $\frac{1}{2}$ teaspoon soda
 $\frac{1}{2}$ cup shortening

Let stand for 5 minutes. 4. Roll into square $\frac{1}{2}$ -inch thick. 5. Have cup of butter very firm and roll out to same size as paste. 6. Place butter on paste. 7. Fold in 4 sides to envelop the butter. 8. Roll out gently in one direction only and fold in 3 layers. 9. Keep paste in cool place and repeat rolling and folding as before 4 times, allowing 15 minutes between each rolling; then roll out to $\frac{1}{2}$ -inch or less in thickness, cut into any size or shape desired and bake in hot oven of 475 degrees until golden brown.

473 DANISH PASTRY

Danish Pastry is a combination of a sweet dough and puff pastry which can only be made with a hard wheat flour such as "Purity." The idea of combining these two delicious pastries originated in Denmark when hard wheat flour was introduced there. It requires a little more careful handling than ordinary bread, but the results are most gratifying and delightful.

The ingredients are:

- 1½ cup white sugar
- 2 teaspoons salt
- 2½ cups shortening or butter
- 3 eggs
- 3 compressed yeast cakes
- 2 cups milk
- 8 cups Purity Flour

TO MAKE BASIC SWEET DOUGH:

Method:—1. Cream sugar and salt with ½ cup shortening or butter. 2. Beat in eggs. 3. Add yeast dissolved in warm milk. 4. Mix in 7 cups flour and work into smooth dough. 5. Let rise to double its bulk. 6. Use remaining cup of flour for flouring board when rolling.

This basic sweet dough can be used for making: Bath Buns, Pecan Rolls, Parker House Rolls, Cherry Nut Rolls, Coffee Cake, Butter-scotch Buns, Finger Rolls, Almond Buns, French Fried Cake, Raised Raisin Cookies, Cinnamon Buns, Jelly Doughnuts, Jam and Jelly Turnovers, etc., as well as Danish Pastry.

TO MAKE DANISH PASTRY:

7. Take basic sweet dough and roll it out to ¼-inch thickness;

spread the 2 cups of shortening or butter evenly over it. 8. Fold the 2 sides in past the centre to form three-layer fold. 9. Flour a platter, place dough on it, cover with towel and let rise for 15 minutes in medium temperature of 70 degrees (if temperature is too hot, shortening melts and separates from dough). 10. Roll dough out again to ¼-inch thickness, always rolling from folded side to folded side, in the same direction. 11. Fold the 2 sides in again past the centre to form a three-layer fold. 12. Replace on floured platter and let rise again for 15 minutes. 13. Repeat rolling, folding and raising 6 times, forming as it were 18 layers. 14. Cut and make into any shape desired such as knots, twists, triangles or rolls. 15. Let rise until light and fluffy. 16. Bake in hot oven of 425 to 450 degrees until a golden brown. 17. When baked, brush over with fruit syrup, such as apricot, peach or pineapple. Reheat if served on following day.

APPLE DISHES

Apples—our own Canadian apples (and there are none finer in any part of the world)—have become a real standby of the modern housewife; because so many and varied are the good things which may be made with them practically the whole year round; because they contain such very important elements in the form of minerals and vitamins, both of which are necessary factors in the health-maintaining diet.

The average composition of the apple is:

Water.....	84.6%	Fat.....	0.5%
Carbohydrate.....	13. %	Minerals.....	0.3%
Protein.....	0.4%	Cellulose.....	1.2%

While the percentage of carbohydrates, consisting mainly of fruit sugar which is readily assimilated, is higher than in some other fruits—iron, phosphate, lime and other minerals are found in the apple in the necessary proper combination to be of the highest value to the body. The action of the apple in digestion is alkali-forming.

Apples are especially rich in Vitamine C, the anti-scorbutic vitamine, which every person—adult and child—needs constantly to keep the body, the teeth in particular, in good condition. This is the vitamine which is destroyed by cooking, in combination with air or oxygen, so it is a wise mother who safeguards the health of her children by giving them raw apples as their between-meal treat. For the very small child the apple should be peeled and grated.

When peeling apples, if it is desired to preserve their whiteness, they may be dropped into cold water into which salt has been placed to the proportion of one teaspoon to one quart of water.

CEREALS

All cereal foods are rich in those properties that are essential to health. They furnish energy, heat and needed bulk. In winter months, particularly, we need these heat-producing foods to build strong muscles, sound flesh and active brain.

Oats may be regarded as the most nutritious of all cereals. They are rich in nitrogenous substances, a large percentage of which is in the form of protein and, therefore, available for tissue building.

542

TEA

Place tea in a scalded earthenware teapot, allowing 1 teaspoon of tea to each cup of boiling water. Let stand 3 to 5 minutes without boiling, then pour at once. If tea is to stand longer than 5 minutes it should be poured off leaves into another heated pot, as it is "over-steeping" that causes bitterness.

In order to completely infuse its strength and flavor, tea may be stirred with a spoon before pouring.

In making tea, always use freshly boiling water.

A teaball may be used, allowing the same proportions of 1 teaspoon of tea to each cup of water.

SANDWICHES

When making sandwiches the following general rules should be noted:

1. Use bread that is not too fresh so that it will slice easily.
2. Cut bread as thinly as possible.
3. Pare away crust from each slice unless for lunch box, picnic or hot sandwiches.
4. Cream butter and spread lightly.
5. Use neatly sliced materials of a size to fit the sandwich.
6. To avoid having sandwiches too moist, mayonnaise or salad dressing should be thick.
7. Cut sandwiches desired shape—they should be small and dainty and always tastefully arranged on the tray.
8. To keep sandwiches fresh, wrap in wax paper, then in dampened table napkin or towel.
9. Lettuce sandwiches should not be made until a short time before serving or they will become soggy.

557 CHEESE AND PIMENTO SANDWICHES

1 can sweet pimentos
1 package cream cheese
Salad dressing
Bread and butter

Method:—Mix pimentos and cheese with salad dressing and spread on buttered slices of bread.

558 HAM AND NUT SANDWICHES

Put ham and nuts through food chopper. Mix with salad dressing and spread on thinly cut buttered bread.

559 WALNUT AND MAPLE SUGAR SANDWICHES

Walnuts
Maple sugar
Bread and butter

Method.—Mix well together equal quantities of chopped walnuts and grated maple sugar and spread liberally between thin slices of bread and butter. Trim and cut into fancy shapes.

560 OLIVE AND WALNUT SANDWICHES

Put walnuts through meat chopper, using coarse blade; drain thoroughly and chop an equal quantity of olives stuffed with pimentos, using a chopping knife and bowl, as meat chopper squeezes too dry. Mix walnuts and olives with sufficient mayonnaise dressing to make a soft paste. Spread between buttered white or whole wheat bread.

PRESERVING AND CANNING OF FRUIT AND VEGETABLES

The equipment required for canning is a wash boiler or similar container with tight-fitting top and wire rack, made to contain as many jars as boiler will hold (usually 6 to 10 jars). Rubbers should be new and of best quality. Boilers should be filled with sufficient warm water to cover jars half way up.

1. **CANNING OR COLD PACK:**—Fill jars with blanched and uncooked fruit or vegetables. Pour boiling water or syrup over contents; screw tops on loosely, and cook according to time-table below. Remove jars, screw tops tightly, and turn upside down to test for leakages.
2. **SCALDING OR BLANCHING:**—Place fresh fruit or vegetables in boiling water for 2 to 6 minutes, so that skins may be removed easily.
3. **COLD DIP:**—Plunge fruit or vegetables from boiling water into cold water. Let stand 2 to 5 minutes to preserve color.
4. Sterilize jars thoroughly and have utensils scrupulously clean, as this is a very important part of canning.
5. Fruit or vegetables should be strictly fresh (never can peas or corn that are over 5 hours old).
6. Add 1 teaspoon of salt to each quart of boiling water for vegetables.
